Accent Technologies is a specialized software and consulting firm headquartered in Melbourne, FL. We help our clients streamline key sales and marketing processes through automation technology and consulting. Our solution and services are used by many top Fortune 500 companies including several of the world's top financial, healthcare and sales and marketing firms. We offer competitive salary commensurate with experience, 401(k) and a desirable benefits plan.

Our team is seeking a highly motivated, conscientious, and exceptional web developer who loves to work in a dynamic, fast-paced environment using the latest technologies for software development. Primary responsibilities involve design, development, and maintenance of code for Accent Technologies' solutions. The selected candidate will work with other experienced software engineers to ensure the quality of the software products by designing and writing code according to specifications highlighted in the design and planning phase, writing and running appropriate diagnostic tests, and proactively solving bugs as problems arise. The selected candidate will also have the opportunity to interact and assist customers and other employees with solution and technical related issues.

### Key Responsibilities:

- Planning, designing, implementing, and modifying the software solutions.
- Working as part of the team in development, testing, debugging and maintenance of solution.
- Working in an extremely fast paced environment to solve problems and meet aggressive deadlines.
- Research current industry trends, and assist with development and promotion of coding best practices within team and industry.
- Implementing using Javascript or ASP.NET, CSS, HTML, DHTML, XHTML, and (C# & VB.NET).
- Designing and developing in a cross browser compatible solution.
- Interacting with and assisting customers and employees at Accent Technologies on software product related issues.

### Qualifications:

- Education: BS degree in Computer Science / Software Engineering (or related field—*a plus*)
- Experience: 3+ years of experience in web development and GUI development).
- Skills: GUI design, web development and scripting languages – Either Javascript or Asp.net (and / or a must), Additional languages would be an added plus, C# & VB.NET, Classic ASP, CSS, HTML, DHTML, XHTML.
- Abilities: Ability to design, communicate, and implement solutions effectively. This includes the ability to evaluate priorities appropriately, identify problems, and solve problems creatively and efficiently. Familiarity with design patterns helpful.
- Other Characteristics: Conscientious, flexible, highly motivated, and results-oriented professional. Must be a self-starter and willing to work individually and as part of a small agile team.

### What We Offer:

Accent Technologies is an EEO Employer.

Accent Technologies offers a competitive compensation package. In addition, we offer a challenging and highly productive work environment that provides significant opportunity for personal growth and advancement. If you're looking for a dynamic and innovative environment, join us at Accent Technologies. We have a great team and offer the chance to help drive a market-leading software company to the next level.
